DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, drawn to an annular seal, are classified in class 277, subclass 654.
 - II. Claims 10-20, drawn to a process for manufacturing a seal, are classified in class 29, subclass 527.4.
2. Inventions I and II are related as process of manufacturing and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to manufacture other and materially different product or (2) that the product as claimed can be manufactured by another and materially different process (MPEP § 806.05(f)). In the instant case, the first layer of the annular seal member of claims 1-9 does not have to be cold formed. As long as the first layer is capable of being cold formed it does not have to undergo a cold forming process as opposed to the cold forming step within the manufacturing process cited in claims 10-20.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
